### **GRAPHICS/NUMBER/LOGOS:**

We need all graphics supplied in vector format, (Adobe Illustrator .ai, Photoshop .eps or .pdf). If designed in Photoshop, we will need the .psd files. These are the graphics files your graphics company has used to create the decals/logos/wraps on your vehicle and should be able to supply them to you. Files labeled .jpg or .png will not work nor be accepted. Sending high resolution photos as .jpg are fine however, because that is how we draw the vehicle.

### **PHOTOS:**

We require digital high-resolution photos of your vehicle, preferably an on-track shot. **Sorry, phone photos, screenshots and photos downloaded through Facebook will not accepted.** Contact your track photographer if you have none. Once your vehicle has been drawn, we cannot turn or rotate the photo. Please send only the angle(s) you prefer, otherwise there will be an additional fee to redraw another vehicle (\$200).

Once you have all this information above, please send an email attaching all photos, graphics files and examples to your account rep. Large files can be uploaded to cloud storage (Dropbox, Google Drive, etc.) and the link can be sent through email. Ask your rep if you have any questions.

### **CHANGES/REVISIONS:**

Please understand that we reserve the right to charge for unnecessary and after-design-is-drawn changes, forgotten items, etc. So please take the time to fully complete this sheet as we use it to complete your design. We understand a new last-minute sponsor may come about, or a sponsor pulled out at the last minute. But, if we do as you request, and you decide the art is not what you want, there will be an additional art fee.

Once we have your art done, we can also offer the art on can coozies, slim can coozies, flip top coozies, bottle coozies, caps, decals, beanies, lanyards, doors, tumblers, shot glasses, flags, pop sockets, license plates, banners, posters, hero cards, etc. Ask your account rep for details.
